

As an American Airlines Flight Attendant, I urge you to please oppose the usage of cell phones on the aircraft during flight. First of all, we have a hard enough time as it is getting passengers to listen/pay attention to crew members instructions. Also, I truly feel it would disturb the other passengers sitting around the cell phone user, as most people using cell phones have a tendency to speak very loud in to the phones. And if everyone on the plane was using a cell, can you imagine the amount of noise in the cabin? Most of all, I truly see it as a "safety issue", and believe cell phone usage has no place onboard the aircraft! Sincerely, Catherine Dawn Landers, an 18 yr. F/A for American Airlines. Thank you for your time and consideration to this very important matter.
